Black Hole Tales from the Edge of Space and Time

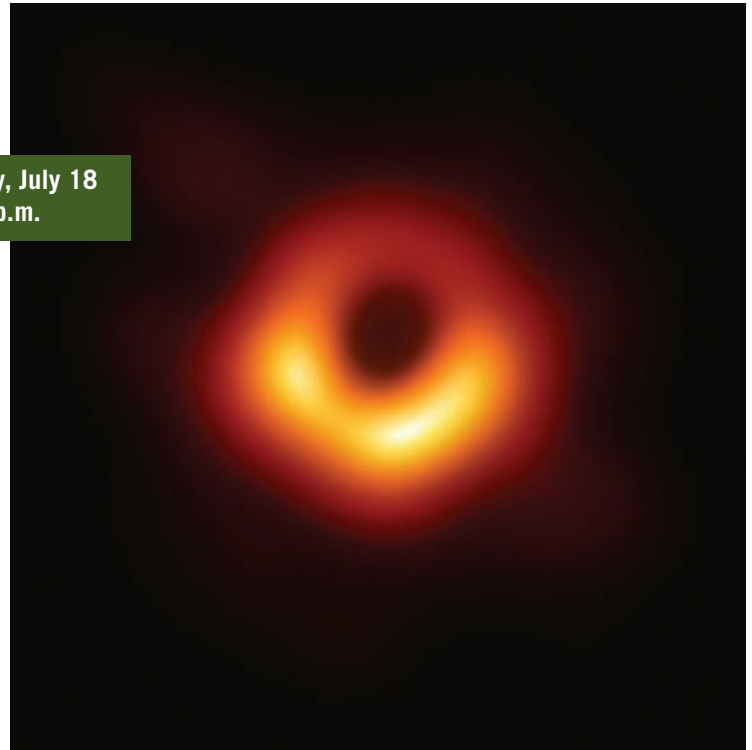

Astronomer Shane Larson returns to the library to discuss the newest evidence for the existence of black holes and how gravitational wave observations will allow us to learn more about these exotic objects. He'll conclude with an auditory sampling of the black hole content of the universe.

Thursday, July 18
at 7:00 p.m.

It has been known since the 1700s that a simple consequence of gravity is the possible existence of objects whose gravitational field is so strong even light would not be able to escape from their surfaces. In the early 1900s, Einstein revolutionized gravitational theory and produced the modern mathematical description of what astronomers now call a "black hole," and they have since become an almost universally accepted part of modern astrophysics.

Dr. Larson is a research associate professor of physics at Northwestern University and associate director of the Center for Interdisciplinary Exploration and Research in Astrophysics (CIERA). *Sponsored by the Friends of the Glencoe Public Library.*

EDOUARD MANET: PAINTER OF MODERN LIFE

Meet the Staff

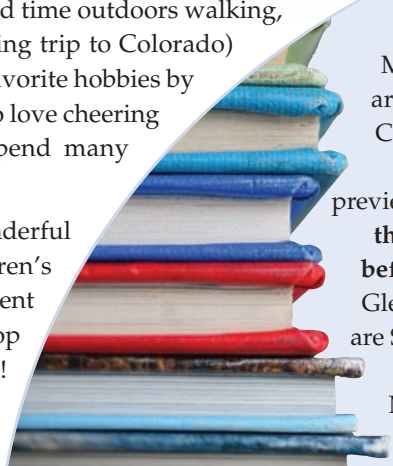

MICHELLE LITCHMAN

While I am new to the Glencoe Library (at least as an employee), I am already a familiar face to many in Glencoe. My family has lived in the village for the past twenty years. During that time, my three children have gone through South, West and Central Schools, played on a plethora of Park District teams, and of course been frequent library patrons. Those who do not know me as a parent probably recognize me from South School. I have worked there for the past three years as a first grade associate and before that as a substitute teacher.

When not at the library or South, I love to spend time outdoors walking, biking, hiking (my photo is from a recent hiking trip to Colorado) and reading. In fact, I love pairing two of my favorite hobbies by listening to an audio book while walking! I also love cheering on my Wolverines at the Big House and spend many football Saturdays in Ann Arbor.

I am thrilled to begin my new role at our wonderful library. You'll find me upstairs in the Children's Department every weekend. I love seeing current and former South School friends, so please stop by for a book recommendation or just to say hi!
